

## **more than what I wanted**

badadada...

badadada...

I wasn't looking all the colors were gray  
It's hard to notice when You're out in the rain  
All of a sudden, colors are starting to change

You brought the light now the darkness is gone  
The search is over now I know you are the one  
Somebody tell me where did an angel come from?  
'cause you're more than just the one

## **more than what I wanted**

**Everything I never had**

**Gotta get right to your heart**

**You can show me where it's at**

**You are the miracle I needed so bad**

**You're more than what I wanted,**

**everything I never had**

badadada...

Somethin' about you can't say what it is  
Thought you should know that You are the reason I live  
I would do anything to make you believe me somehow  
So I'm telling you now

## **more than what I wanted.....**

Just let me say I would die for you (...die for you....uuuh....)  
Give all I have to prove my love is true  
And I'll never let you go...

**more than what I wanted.....**

**more than what I wanted.....**

**more than....**
